Information Gathering (OSINT) Lab Report

Student Name: Muhammad Usman Saleem

Course: Certified Ethical Hacker (CEH)

Lab: Week 2 — Information Gathering (OSINT)

1. Introduction

This lab focuses on Open Source Intelligence (OSINT) techniques to investigate a suspicious domain. The target used is a safe practice domain: testphp.vulnweb.com. Various tools such as WHOIS, DNS lookup, theHarvester, Shodan, and Google Dorks were used to gather intelligence.

2. WHOIS Lookup

The WHOIS lookup provides information about domain ownership, registrar details, and name servers.
Findings:

- **Registrar:** Gandi SAS
- **Creation Date:** 2010-06-14
- **Name Servers:** NS-105-A.GANDI.NET, NS-11-B.GANDI.NET, NS-140-C.GANDI.NET
- **Contact Info: Email:** abuse@support.gandi.net, Phone**:** +33.170377661
  Available (Not Protected)

3. DNS Enumeration

DNS enumeration helps identify IP addresses and domain mappings.

Commands used:
nslookup testphp.vulnweb.com
host testphp.vulnweb.com

Findings:
- IP Address: 44.228.249.3
- Domain Resolution: Successful

```
┌──(kali㉿kali)-[~]
└─$ nslookup vulnweb.com
Server:         192.168.9.1
Address:        192.168.9.1#53

Non-authoritative answer:
Name:   vulnweb.com
Address: 44.228.249.3

┌──(kali㉿kali)-[~]
└─$ host vulnweb.com
vulnweb.com has address 44.228.249.3
vulnweb.com mail is handled by 10 alt1.aspmx.l.google.com.
vulnweb.com mail is handled by 10 alt4.aspmx.l.google.com.
vulnweb.com mail is handled by 10 aspmx.l.google.com.
vulnweb.com mail is handled by 10 alt3.aspmx.l.google.com.
vulnweb.com mail is handled by 10 alt2.aspmx.l.google.com.
;; communications error to 192.168.9.1#53: timed out
;; communications error to 192.168.9.1#53: timed out
;; no servers could be reached
```

4. The Harvester Results

theHarvester tool is used to collect emails and subdomains.

Command:
theHarvester -d vulnweb.com -b duckduckgo, yahoo, crtsh
Findings:
- Emails Found: None
- Subdomains:

- 25252Ftestphp.vulnweb.com
- 3dTestphp.vulnweb.com
- Test.vulnweb.com
- Testhtml5.vulnweb.com
- Testphp.vulnweb.com
- rest.vulnweb.com
- scan-report-testphp.vulnweb.com

- test.vulnweb.com
- testasp.vulnweb.com
- testaspnet.vulnweb.com
- testhtml5.vulnweb.com
- testphp.vulnweb.com

```
┌──(kali㉿kali)-[~]
└─$ theHarvester -d vulnweb.com -b duckduckgo,yahoo,crtsh

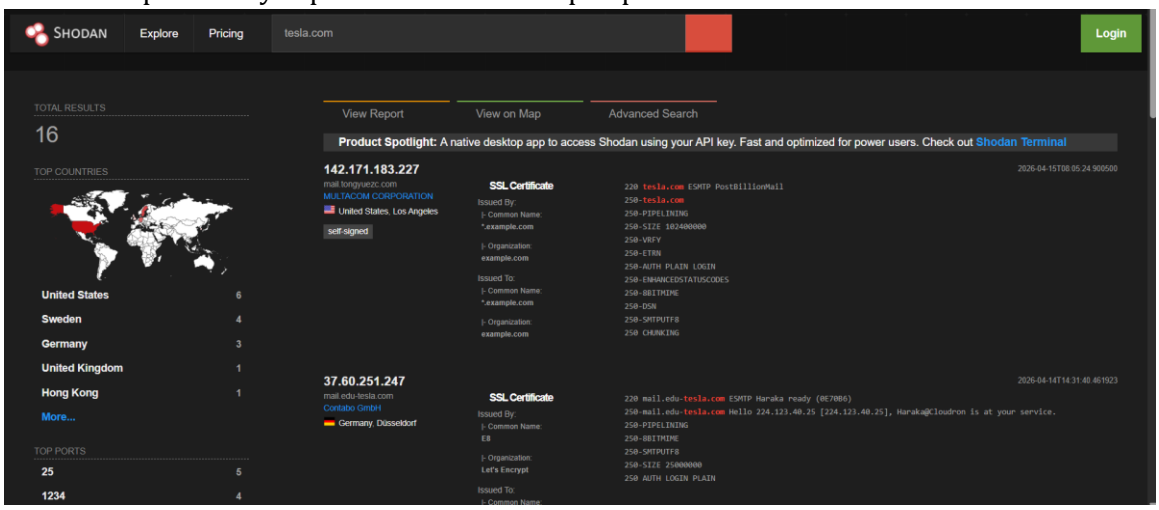
5. Shodan Analysis

Shodan helps identify exposed services and open ports.



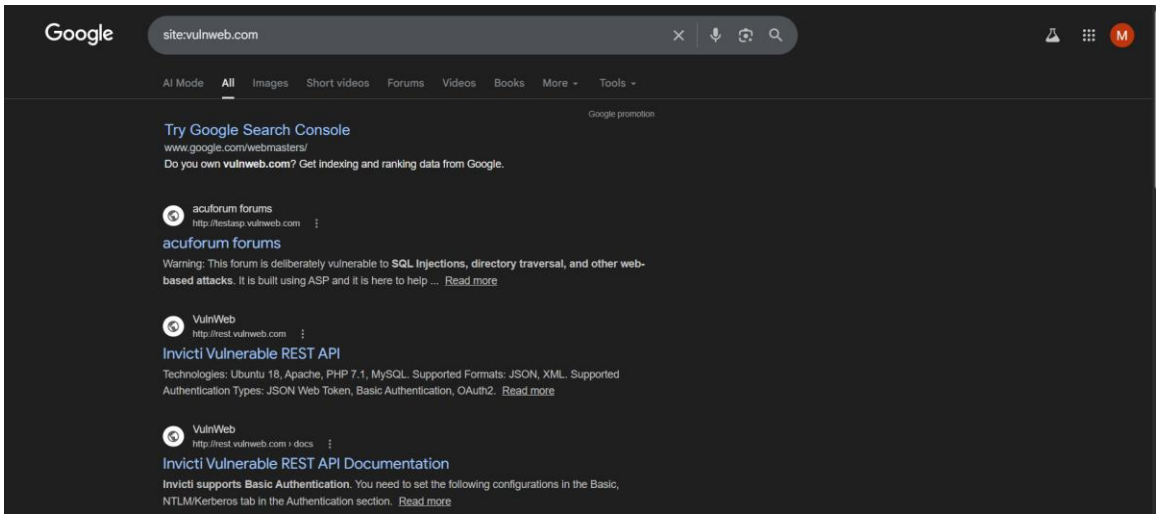
6. Google Dorks

Google Dorks help find indexed pages and sensitive directories.

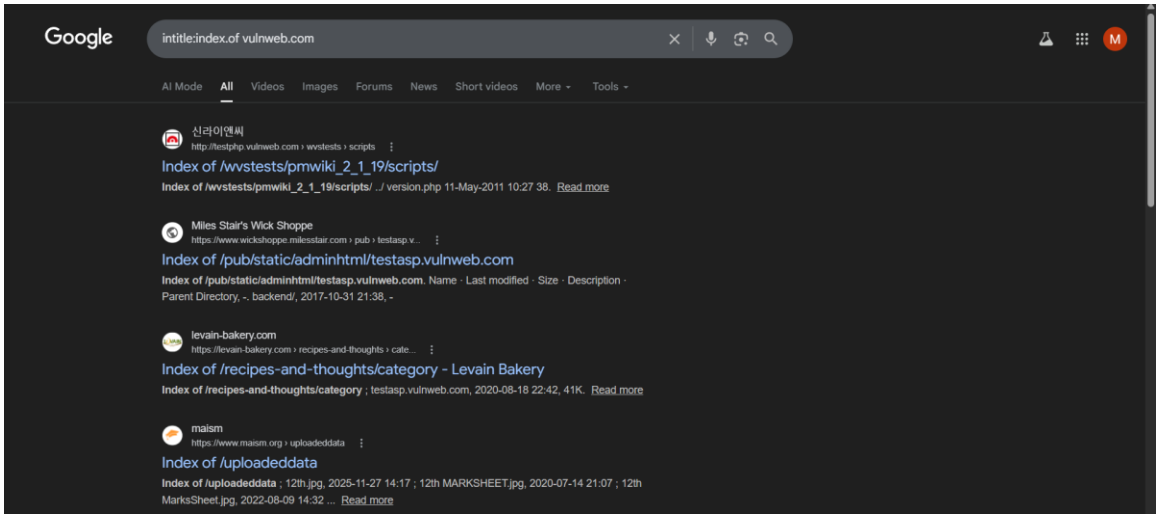
Queries used:

site:vulnweb.com
intitle:index.of vulnweb.com

Findings:
- Indexed Pages: Multiple pages found



- Sensitive directories: None critical



7. Conclusion

The domain appears to be a deliberately vulnerable test site used for training purposes. No critical malicious indicators were found. The exposed services are typical for a web server. This lab demonstrates how OSINT tools can be used for reconnaissance and intelligence gathering.
